

1999-2008 Summary

The Ireland-Northern Ireland-NCI Cancer Consortium contributes to the control of cancer by focusing its collective resources on specific areas of scientific research – clinical trials, information technology, epidemiology and cancer registry, cancer prevention and early detection, nursing, health economics and cancer policy analysis, palliative care, biobanking, and training/scholar exchange. Below is a summary of some of the Consortium's accomplishments throughout the years:

- Expanded support of joint clinical research studies through collaborations with the Northern Ireland Cancer Clinical Trials Unit, which recruits approximately 700 patients annually, and the All Ireland Cooperative Oncology Research Group (ICORG). Since 2000, over 2,600 patients from Ireland and Northern Ireland have enrolled in Consortium-sponsored studies through ICORG.
- Improved access to cancer care, clinical research, and educational opportunities for health care professionals through the installation of several state-of-the-art TELESYNERGY® multimedia medical imaging workstations across the island of Ireland, including six full TELESYNERGY® systems and four TELESYNERGY® Lite systems.
- Increased collaborations between cancer registries in the North and South, resulting in the development of two *All-Ireland Cancer Statistics Reports* and several jointly-authored publications in peer-reviewed journals on the island of Ireland and in the United States (U.S).
- Developed cadre of prevention professionals on the island of Ireland through workshops and training programs such as the NCI Summer Curriculum in Cancer Prevention and the Cancer Prevention Fellowship Program (CPFP).
- Impacted the overall education of cancer professionals on the island of Ireland through workshops, conferences, NCI training/coursework opportunities, and other scholar exchange programs.

2000-2008

IRELAND • NORTHERN IRELAND • NATIONAL CANCER INSTITUTE
CANCER CONSORTIUM

TIMELINE OF ACTIVITIES

Consortium Origins

In October 1999, representatives of Ireland, Northern Ireland, and the U.S. signed a Memorandum of Understanding (MOU) to establish the Ireland-Northern Ireland-National Cancer Institute (NCI) Cancer Consortium. In November 2006, the MOU was signed again, reaffirming the commitment between Ireland, Northern Ireland, and the U.S. to work together to reduce the burden of cancer. Both signing ceremonies took place at Belfast's Waterfront Hall in conjunction with the 1st and 3rd All-Ireland Cancer Conferences (AICC). The enhanced partnership between each jurisdiction will enable the further development of improved scientific programs in the following areas:

- Prevention and early detection;
- Diagnosis and treatment;
- Palliative care and survivorship;
- Interactions aimed at enhanced public-health and patient-care;
- Research (including biobanking);
- Education and training for physicians, nurses, and scientists;
- Epidemiology (including registration and surveillance);
- Quality assurance; and
- Cancer policy analysis and health economics.

Additional Information

Number of scholars endorsed by the Consortium by jurisdiction and program, 2000-2008.

Type of Exchange Program	Duration of Program	Participants by Jurisdiction			Total Participants
		Ireland	Northern Ireland	United States	
Epidemiology Fellowship	3 years	2	1	1	4
NCI Clinical Trials Training for Nurses	3 weeks/3 months	11	7		18
Clinical Trials E-learning Module for Nurses	12 weeks	10	16		26
Health Research Board (HRB)/NCI Health Economics Fellowships in Cancer Program	4 years	2			2
NCI Summer Curriculum in Cancer Prevention: Molecular Prevention Course	1 week	97	39		136*
NCI Summer Curriculum in Cancer Prevention: Principles and Practice of Cancer Prevention and Control Course	4 weeks	66	27		93†
NCI Cancer Prevention Fellowship Program	3 years	4	4		8
Joint Research Projects in Cancer (JRPC)	2-3 years	6‡	3	7	16
